EC System: External System, Servers, Software and System

Live Dealer Lobby Activation URL

URL: <https://games.vivogaming.com?>

Mandatory Parameters:

- Token: Unique token generated by External system
- OperatorID: Unique parameters provided by VG
- Application: lobby

Optional Parameters:

- Language: Code of the language to open
- LogoSetup: Operator logo code / VIVO_LOGO / NO_LOGO
- SelectedGame: Optional parameter for the default game tab selected in the lobby (Remember the value of the parameter must be lowercase (lobby, roulette, baccarat, blackjack))
- IsInternalPop: True/False Parameter that allows the games to open as an iframe inside lobby window, as default or if false is passed the games will be opened as pop-up windows.
- IsPlaceBetCTA: True/False As default bets will be sent automatically when betting times end, if passed "true" user should press "submit bets" button for bets to be confirmed.

- HomeUrl: <http://www.vivogaming.com> this function will show a button in the games and lobbies, pressing this button will redirect the user to the home URL requested.
- CashierURL: External system may transfer the URL they wish to be opened when player clicks “buy Chips” inside VG game interface. please note that we will also include some parameters when calling your Deposit URL, for example:

<http://www.operatorsite.com?token=11234443&playerID=1322222&operatorID=123>

We usually pass these 3 parameters for internal use or for you to validate the user if needed, but you may disregard these parameters if you have no need for them but please expect them in the URL. Another important point here which you should keep in mind, please always make sure to include the protocol when passing the URL (either http or https at the beginning).

Example:

<https://games.vivogaming.com/?token=ICE2016-2&operatorid=1453&IsSwitchLobby=true&selectedGame=BlackJack&Application=lobby&language=EN>
